

Grade 10 Mathematics

Unit 1

RELATIONS AND FUNCTIONS

Unit Outcomes

By the end of this unit, students will be able to:

- define relation
- define function
- identify types of functions
- sketch graphs of linear and quadratic functions

1.1 Relations

Competencies

By the end of this sub-unit, students will be able to:

- define patterns.
- produce sequences of patterns.
- define a relation
- determine the domain and range of a relation.

1.2 Functions

Competencies

By the end of this sub-unit, students will be able to:

- define function
- sketch the graph of the function and
- find the domain and range of a function.

1.2.2 Combination of functions

Competencies

By the end of this sub-unit, students will be able to:

- Add or subtract two or functions;
- Find the product or quotient of two or more functions

1.2.3 Types of functions (It needs more focus because it only exists in this grade.)

Competencies

By the end of this sub-unit, students will be able to:

- Identify different types of functions (one to one, one to one correspondence, onto function)

1.2.4 Graphs functions (It needs more focus because it only exists in this grade specially graph of quadratic function)

Competency

At the end of this subunit, students will be able to:

- find x and y-intercept of the graph of a function
- determine the domain and range of a function
- sketch the graph of a function
