

Grade 11 Maths Unit 6

Unit Outcomes

By the end of this unit, students will be able to:

- Know basic concepts about transforming of the plane.
- Apply methods and procedures of transformation to transform plane figures.

6.1 Introduction

Competencies

- explain what is meant by transformation of the plane.
- describe the main properties of rigid motion.

6.2 Translation

Competencies

- translate points, lines and circles using vectors

6.3 Reflection

Competencies

- reflect points, lines, circle and some other plane figures.

6.4 Rotation

Competencies

- determine the images of a given plane figure when rotated through an angle.

6.5 Applications

Competencies

- Use the concept of transformations to solve different real-life problems.
- Use the concept of transformations to avoid car accidents.
