

## **Grade 12 Maths Unit 4**

### **Unit Outcomes**

**By the end of this unit, students will be able to:**

- Deduce how to find regions of inequality in a plane.
- Solve systems of linear inequality.
- Formulate linear programming problems.
- Solve real life problems of linear programming problems graphically.
- Use spreadsheet to solve Linear Programming Problems.

### **4.1 Graphical Solutions of System of Linear Inequalities**

#### **Competencies**

- Draw graph of linear inequality
- Draw of graph of systems of linear inequalities

### **4.2 Maximum and Minimum Value**

#### **Competencies**

- Find maximum and minimum values of a given objective function under given constraints.

### **4.3 Applications**

#### **Competencies**

- Create inequalities from real life examples for linear programming and solve the problem
- Solve practical problems related to road traffic, customer production, tax, climate change
